

Homework 03 – Started with your Project

1. Complete the SRS following the template and sample for the your project:
 - a. Use case diagram
 - b. Glossary: Define some common terminologies in the system.
 - c. Activity diagram for business processes. There may be several business processes in the system. A business process may include some use cases and some manual operations.
 - d. Each member in the group need to do the specification for **at least ONE common use case** (e.g. log in, change password), and **at least TWO business use cases** (e.g. for Internet Banking software: transfer to an external account, pay electric receipt, create an online saving).
