Homework 05 – Architectural pattern

1. Choose software architectural patterns for front end (if any) and back end of your project
   a. Frameworks (if any)
   b. Programming languages
2. Describe the software architecture of your project (implementation)
   a. Origin architectural pattern (e.g. Layered pattern, MVC pattern...)
   b. Implementation (with figure):
      i. Detail description/function of main components in the architecture
      ii. Main flow of the architecture
3. Re-design for all assigned use cases and analysis class diagrams following the chosen frameworks / architectural patterns
4. Each member programs for one use case following the chosen frameworks / architectural patterns
