Homework 04 – Architectural Design

1. Taking the input from the SRS of your project, each member continue to make architectural design for assigned use cases (3 use cases / member):
   a. Find out analysis classes for each use case
   b. Draw sequence diagram and communication diagram for each use case

Note: In the class, I made an example that uses 3-tier model. If you use MVC model, please modify the way and name as its role.
